

SANDEEP N KUNDEKAR

Frontend Developer | React.js | Next.js | 3+ Years Exp | TypeScript | Redux | REST APIs | Performance Optimization
Belgaum, Karnataka, India | sandeepkundekar1000@gmail.com | +91 8217291928 | linkedin.com/in/sandeepkundekar

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building performant, scalable web applications using JavaScript, TypeScript, React.js, and Next.js. Experienced in optimizing frontend performance, implementing scalable state management architectures, migrating large codebases to TypeScript, and building reusable component systems. Strong hands-on experience with SSR/SSG, API integration, performance tuning, testing, and modern frontend architecture, with a focus on delivering maintainable, production-grade applications.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3.

State Management: Redux Toolkit, React Query, Context API, Zustand.

APIs & Auth: REST APIs, GraphQL, JWT Authentication.

Testing: Jest, React Testing Library, Playwright.

Styling: Tailwind CSS, Material UI, Bootstrap

Backend & DB: Node.js, Express.js, MongoDB

DevOps & Tools: Git, GitHub, Docker, Webpack, Vite, Storybook

Performance: Web Vitals, Lazy Loading, Code Splitting, Memoization, Redis

Architecture: Micro-frontends, RBAC, SSR, SSG, CSR, Component Libraries

PROFESSIONAL EXPERIENCE

React.js Developer | TMITs – Technomind Solution Ltd | Belgaum, India *Apr 2025 – Apr 2026*

- Developed and optimized a **Next.js-based e-commerce platform** using SSR/SSG and API-layer caching, improving Lighthouse performance scores by **30%** and reducing initial page load latency.
- Architected feature-level state management using **Redux Toolkit and React Query**, improving API-state consistency and reducing redundant server requests by **35%**.
- Built role-based dashboard modules for a logistics workflow platform, implementing **lazy loading and route-level code splitting** to improve page responsiveness.
- Developed reusable UI components with **Storybook**, standardizing component usage across multiple modules and improving development consistency.
- Migrated legacy JavaScript (ES6+) codebase to **TypeScript**, enforcing strict type safety and reducing runtime errors by 30%.

Frontend Developer | Priyaraja Electronics Ltd | Bengaluru , India *Sep 2023 – Mar 2025*

- Optimized render performance by reducing unnecessary component re-renders using **memoization, state normalization, and route-level code splitting**, improving application responsiveness.
- Led migration of legacy JavaScript modules to **TypeScript**, improving type safety and reducing runtime defects during feature delivery.
- Collaborated in Agile/Scrum sprints, participating in code reviews, sprint planning, and retrospectives to maintain code quality and delivery velocity.
- Wrote Playwright end-to-end (E2E) test suites to validate critical user flows, increasing test coverage and reducing regression defects.

Frontend Developer Intern | Zicops | Remote *Dec 2022 – Apr 2023*

- Contributed to a real-time conferencing module using **Next.js and WebRTC**, implementing responsive interfaces and real-time participant interaction flows.

KEY PROJECTS

E-Commerce Platform | React.js, Redux, Node.js, Express.js, MongoDB, JWT, Stripe

- Built a full-stack e-commerce application with authentication and payment integration.
- Implemented Redux-based state management for cart, orders, and user workflows.
- Optimized performance using lazy loading, memoization, and database indexing.

Task Management System (Jira-like) | React.js, Redux, Node.js, Express.js, MongoDB

- Developed a drag-and-drop task dashboard with role-based access control.
- Built centralized state management using Redux for task workflow handling.
- Improved reliability and performance through testing, memoization, and code splitting.

Quiz & Blogging Platform | React.js, Node.js, Express.js, MongoDB, JWT

- Built a platform for quiz creation, blog publishing, and user management.
- Implemented secure JWT authentication and REST API-based content workflows.
- Improved maintainability through modular component design and unit testing.

EDUCATION

B.E. – Electronics & Communication Engineering

Jain College of Engineering, Belgaum (VTU)

CGPA: 7.56 / 10

Aug 2018 – Aug 2022

PROFESSIONAL DEVELOPMENT

- Advanced React Patterns & Hooks
- Next.js App Router, SSR/SSG Strategies
- Micro-frontend Architecture Design
- System Design for Frontend Engineers

SELECTED IMPACT

- Improved Lighthouse performance score by **30%**
- Reduced redundant API requests by **35%**
- Migrated production modules to TypeScript
- Built reusable Storybook component library
- Increased frontend test coverage to **85%+**
